## **FOR IMMEDIATE RELEASE**

### **UMF Medical Unveils New Low-Cost, ADA-Accessible Power Exam Chair, Making ADA Access More Feasible for Every Exam Room**

**JOHNSTOWN, PA – July 13, 2020** – UMF Medical introduced the new low-cost, ADA-accessible FusionONE™ Power Exam Chair today, making it more affordable for healthcare providers to accommodate patients of all ages and abilities in the exam room.

“Our goal was to build a power exam chair that can be easily accessed by virtually anyone,” said Eileen Melvin, President & CEO for UMF Medical, “and we made it even more affordable than other chairs on the market. Affordability and accessibility have never been more important than now.”

With the accessibility of a power exam chair and the affordability of a box table, this new hi-lo exam chair offers the features healthcare providers need most – all in one chair.

“The U.S. patient population is rapidly changing,” said Melvin. “About 50% of adults over age 65 have a disability, and the population over age 65 is projected to nearly double by 2060.”

Traditional box exam tables are not easily accessible for older patients and can pose safety risk for patients and clinicians alike.

The FusionONE Power Exam Chair can accommodate multiple specialties and is offered in three models – 3001, 3002 & 3003. Each model offers varying features to accommodate diverse clinical needs and budgets.

The model 3003 comes fully equipped with foot control, front storage drawer, reversible side storage drawer, stirrups, drain pan, drawer warmer, pelvic tilt and electrical receptacle. It can accommodate multiple specialties for examination.

-More-
